This week in conclave assembled the cabinet women resolved to receive on Wednesdays in December. When this momentous subject was decided, some of the cabinet hostesses took the lib-erty of announcing it to some newspaper friends, and the innovation was duly heralded and applauded, cabinet receptions heretofore not having commenced until after New Years. Accordingly, last Wednesday half of the congressional contingent, newly arrived and anxious to display their gladsome raiment, prepared to call at the cabinet homes. Washington, Dec. 23 -A complaint diected against railways operating west from Chicago and charging unreasonable and discriminatory rates in rubber thres for bleycles and vehicles was filed with the interstate commerce commission to-day by the Fiske Rubber company of Chicopee, Mass.

Chicopee, Mass.

Springfield, Mass., Dec. 22.—The completing is directed against the Atchison. Topeka & Santa Fe Railway company, the Chicago & Northwestern Railway company, the Chicago & Northwestern Railway company, the Chicago, Milwaukee & St. Paul Railway company, the Great Northern Railway company, the Great Northern Railway company, the Great Northern Railway company, the Oregon Railway company, the Oregon Railway company, the Oregon Short Line railroad, the Southern Pacific Railroad company and the Wisconsin Central Railway company.

This compaint is one of seven distinct charges and is based on the ground that the charges on rubber tires in the territory through which the defendant companies operate is excessive. The excessive charges are chiefly due to classification. In the scuthern territory rubber tires are carried as first-class material, while in the territory in which the defendant companies operate a rate of two and one-half times the rate of first-class material is charged, according as to whether the tires are inflated or deflated. This rates makes the charge on less than carload lots in the territory operated by the defendant railroad companies in excess of the express charges to the same point.

The zetion taken by the Fiske company is not in any way connected with the present railroad rate agitation, and its only, significance is in the classification of rubber tires in general. While the Fiske Rubber company is the complainant in this case, practically all the rubber interests in the country are interestical and are in sympathy with the movement and are parties to this action.

The complaint filed by the Fiske company is made with the view of bringing the matter before a public tribunal, there to discuss whether or not the rates at present charged are excessive. the very independent mistress of the White House.
